

Stop Guessing. Know Exactly Where AI Fits Your Business.

Most small businesses are losing hours every week to manual work that shouldn't exist anymore. Not because they're inefficient, but because the system was never structured properly.

This audit shows you exactly where that's happening — and what to fix first.

WHAT THIS IS REALLY WORTH

A part-time assistant costs **\$20+ per hour** — thousands per month. This is a one-time diagnostic that shows you where that labor can be reduced or eliminated.

The result: fewer manual tasks, fewer dropped balls, and **hours returned every week**.

THIS IS FOR YOU IF

You run a small business, consultancy or creative operation — and your work still depends on too many manual steps.

You know it could be streamlined, but you don't have time to figure out how.

HOW IT WORKS

- 1** Select your tier and complete the intake form. No calls required. You describe your business, your current tools and where you feel the friction most.
- 2** Your workflow is analyzed and every area where time can be reduced, repetitive tasks eliminated and leverage created is mapped.
- 3** Your audit report is delivered to your inbox. For Tier 2, your configured workflow assets come with it.
